

Amendments to the Abstract

Please replace the Abstract (page 13 of the specification) with the following amended abstract:

Planar tiles have a specified design are used to cover openings in meshes such as chain link fences. The tiles can be arranged to form alphanumeric characters or other writings, various designs or other patterns. The tiles ~~can also be the~~ are made of a flexible, resilient material is such as a polymer sheet material; or paper or cardboard that is coated with wax or a polymer layer. The tiles may be used to affix various attachments to the mesh, or to carry printed or other matter.
